

VanAire Inc. to Be Featured on 21st Century Business Television Series

Boca Raton, FL (TBD) --- Multi-Media Productions (USA), Inc. is pleased to announce that VanAire Inc. will be featured on *21st Century Business*. This segment will focus on VanAire's wastewater pretreatment equipment.

In 1992, VanAire introduced the next generation in Dissolved Air Flotation (DAF) technology. Using sound thermodynamic and fluids mechanics engineering principals, this technology continues to be the basis of the most advanced and efficient DAF products on the market.

VanAire's DAF system is not only cost effective and efficient, but has also proven to maximize the removal of contaminants from wastewater. Their fully integrated production facility allows VanAire to take any DAF project from a concept to an operational wastewater pre-treatment system.

JL Haber, Vice President of Programming at Multi Media Productions, added, "VanAire is an innovator and a leader in their industry. We are excited to have them as a guest on our program."

About VanAire Inc.

VanAire's mission is providing practical, economical and technologically sound solutions for the pretreatment of industrial wastewater and the recovery of marketable by-products.

VanAire's principles are simple. First, we create the finest, most effective bubbles for the removal of organic and inorganic contaminants from industrial wastewater. Then, we introduce them properly to the waste stream to maximize the natural attraction of bubbles to the contaminants. Finally, we utilize chemical assistants such as coagulants or flocculants only when absolutely necessary.

VanAire's main contribution has been to significantly reduce the use of polymers and other chemical assistants that compensate for mechanical deficiencies in DAF equipment design and operation. VanAire's wastewater pretreatment equipment helps our customers save money by reducing TSS, BOD, and FOG discharge levels, therefore reducing surcharges, increasing by-product recovery, reducing loads on lagoons and secondary treatment facilities, and preventing costly expansions of secondary treatment facilities.

About 21st Century Business

21st Century Business is an award winning targeted business show that is independently produced by Multi-Media Productions. The show provides its business viewers an in depth opportunity to find solutions to the industry problems from some of the top business leaders from across the world. Each exclusive segment is taped in our state of the art South Florida Studio.

Once selected, companies are able to present their story and solutions to industry problems in an exclusive way that sets their company apart from the others. With more than 6,000 companies participating on over 600 shows, 21st Century Business continues to be the premier and targeted outlet for the latest business stories.

21st Century Business airs on various national cable networks that are viewed by over 100 million viewers nationwide as well as internationally via DirecTV and Dish Network. The 21CBTV Series is also available at more than 27 prestigious college universities, including Carnegie Mellon University, Howard University, Dartmouth College and Georgetown University.

For specific market-by-market air dates and times, please e-mail Moniqueh@mmpusa.com. For more information, please visit <http://www.21cbtv.com>.
